DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nantua (2003/0059138).

Nantua discloses a sealing device with rotation detector. The device comprises a stationary element 4 with an attachment ring and a seal ring 33 having a lip 39. The device comprises a rotation element 5 with a seal flange 12 formed as a disc at the inside of an engine. The lip 39 contacts the flange 12. The device comprises a to-be-detected disc 6 fitted to an end part 17 at the opposite side of the seal flange 12. The disc has a magnetized rubber disc 6 on the outside surface of flange 14. An outer peripheral edge (near 28) of the disc 6 closely faces the inner peripheral surface of the stationary element.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bochet appears to disclose the device in a similar manner as Nantua. Also see Ichiman '596 and Niebling '574.
